

Planner Cover Assessment

Level 1 I can...

I can do a tack stitch.

I can use key equipment.

I can name one piece of equipment.
I can say what's good about my work.

Test Score

Level 2 I can...

I can do an accurate tack Stitch.

I can use key equipment safely.

I can name several piece of equipment.
I can say which parts of my work are good and why.

Test Score

Level 3 I can...

I can do an accurate tack Stitch that could be used to hold things in place.

I can use all equipment safely and independently.
I can thread a sewing machine with help.

I can name several piece of equipment and describe how to use them safely.
I can say which parts of my work are good / not so good and why.

Test Score

Level 4 I can...

I can do an accurate tack Stitch that will hold my zip in place.

I can explain what I'm doing when making and say why I am doing it.
I can use a range of terminology.
I can thread a sewing machine independently.

I can name a range of equipment and describe how to use them accurately and safely. I can explain the good / not so good parts of my work and suggest improvements.

Test Score

Level 5 I can...

I can do an accurate straight stitches using the sewing machine.

I can explain what I'm doing when making and say why, linking to accurate equipment and terminology.

I can name a wide range of equipment and describe how to use them accurately and safely. I can explain the good / not so good parts of my work and suggest improvements and how they would be done.

Test Score

Level 6 I can...

I can do an accurate straight stitches using the sewing machine.

I can explain what I'm doing when making and say why, linking to accurate equipment and terminology. I make modifications as I'm making if necessary.

I can name a wide range of equipment and explain how to use them accurately and safely. I can explain and evaluate in detail, suggest improvements and further developments that would create a better-quality outcome.

Test Score

Level 7 I can...

My sewing machine stitch is accurate and straight and the colours are chosen for a reason.

All aspects of my making can be explained in detail, I make modifications as I'm making to further improve. Quality of the outcome is high.

I can modify my work during making to improve the outcome. Further developments are suitable and planned linking to technical processes.

Test Score

Level 8 I can...

Stitching is of high professional shop quality

Exemplar final piece of a very high standard

The full design and making process is evaluated in detail considering complex improvements and further developments.

Selfie Art Assessment

Level 1 I can...

I can use some tools, equipment, materials and techniques with guidance and assistance

Produce a largely complete sample/product.

I can show awareness of the stages that my made product goes through.

Test Score

Level 2 I can...

I can use some of the correct tool, equipment, materials, components and techniques.

Produce a largely complete sample/product.

I can identify one feature of the product and suggest 1 area for improvement

Test Score

Level 3 I can...

I can show evidence that I have followed the QC instructions in order to complete my product

I have a complete sample/product

I can identify at least 2 features that worked well and suggest 2 areas for improvement
I can describe how I made the product using a sequence including some key terms/words

Test Score

Level 4 I can...

I can independently select and use a range of materials components and techniques.

I can make a fully complete sample/product that shows some level of demand.

I can describe how I made the sample/product, explaining the parts I found easy and areas where I need to develop my skill.
I can suggest at least 2 areas for improvement.

Test Score

Level 5 I can...

I can select and correctly use equipment/tools and understand why different machine feet/sewing needles/etc are used for different techniques

I understand why different materials are used to create different techniques/samples

I can produce a detailed description of the making process and identifying areas where skills have been consolidated and where further practice is needed.

Test Score

Level 6 I can...

I can choose my own equipment/components/materials to make a high quality product that resembles the work of the artist

I have shown evidence of QC, health and safety in my sample/product.

I can evaluate the making process, suggesting how my work could be improved to look more like the work of the artist I am studying.

Test Score

Level 7 I can...

I can work independently to produce a sample/product of incredibly high standard.

I have shown evidence of QC, health and safety in my sample/product.

I can evaluate the making process, suggesting how my work could be improved to look more like the work of the artist I am studying.
I can modify my product to enable it to fulfil these criteria

Test Score

Level 8 I can...

I can work independently to produce a rigorous and demanding sample/product

I have produced a sample/product that is of shop bought quality.

Evaluated throughout the designing and making process making changes as you go as well as evaluating at the very end
